A graduate of Informatics Engineering from Universitas Ahmad Dahlan with a strong interest in Frontend Developer and Software Quality Assurance (SQA) web application testing. I have hands-on internship experience as Programmer with testing experience, where I was responsible for testing and ensuring the quality of digital products. I am proficient in manual testing and capable of writing automation scripts using Python and Selenium.

EDUCATION

Ahmad Dahlan University

September 2020 – September 2024

- Bachelor of Informatics Engineering | GPA: 3.82

WORK EXPERIENCE

PT. Talenta Sinergi Group (Eduwork)

October 2023 – January 2024

Programmer (Intern)

- Developed responsive UI for Eduwork platforms using Laravel & Tailwind.
- Converted UI/UX designs into functional interfaces with clean, maintainable code.
- Created structured and comprehensive manual test cases that improved testing clarity and reduced overlooked defects during QA cycles.
- Improved regression testing efficiency by creating Selenium IDE test cases.

Tester Work

July 2025 – September 2025

Software Quality Assurance (Freelance)

- Performed manual functional testing of the Instagram Basic Mode feature under specific Telkomsel data limitations.
- Executed general cash out/withdrawal testing scenarios on the Decaf App to validate core financial workflows.
- Conducted end-to-end Cash In – Cash Out flow testing to ensure transaction accuracy, stability, and user experience consistency.

PROJECT EXPERIENCE

Beshoes Laundry System

April 2023 – August 2023

Front End Developer (Freelance)

- Developed full-stack laundry management system using PHP, MySQL, HTML, CSS, and JS.
- Translated UI/UX designs into responsive, interactive web interfaces.
- Managed version control with Git and documented test cases in detail.
- Automated key front-end flows using Selenium IDE.

HiSocial Digital Solution

October 2023 – January 2024

Software Quality Assurance (Intern)

- Designed and executed comprehensive manual test cases ensuring full feature coverage.
- Performed functional, responsiveness, and browser compatibility testing.
- Developed automated tests (Pytest + Selenium) for critical workflows.
- Reported defects and maintained test scripts using Git for version control.

ADDITIONAL EXPERIENCE

MySkill

November 2025 – Ongoing

Software Quality Assurance

- Completed Software Quality Assurance Learning Path on Myskill, focusing on manual and automated testing fundamentals.
- Gained hands-on experience with tools like Selenium, Katalon, and Postman for API and UI testing.
- Learned to implement CI/CD testing workflows and apply QA best practices in real-world project scenarios.

SKILLS

Hard Skill:

- Programming & Frameworks: HTML5, CSS3, Tailwind CSS, JavaScript, PHP, Laravel, Python
- Database Management: MySQL, PostgreSQL
- Version Control: Git, Gitlab, Github
- UI/UX Implementation: Figma
- Testing: Manual Testing, Test Case, Reporting, Automation Testing, Selenium IDE, Pytest

Soft skill:

- Problem Solving
- Teamwork & Collaboration
- Data Analysis
- Discipline & Responsibility
- Leadership
